(54) Title: A METHOD AND SYSTEM FOR TRIGGERING NETWORK ACCESS

(57) Abstract: The present invention makes it possible that devices are triggered by RF signals and the owner of the RF chip responsible for the triggering can receive a financial compensation for this. Hereto a method and a system for triggering a first-device by a RF signal and logging the triggering are presented. The system comprises a RF chip of a first party. The first device comprises communication means for receiving a RF signal from the RF chip and communication means for communicating with a network or server of a second party.
